Chief Financial Officer Division Chief

Transportation Programming

Subject: STIP AMENDMENT 06S-015

SUMMARY:

The Department of Transportation (Department) and San Diego Associated Governments (SANDAG) are proposing the following State Transportation Improvement Program (STIP) Amendment.

Route 905 freeway – Otay Mesa project (PPNO 0374K) in San Diego County. Amend STIP project to:

- Program \$81,289,000 of Federal Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU) Border Infrastructure Program (BIP) funds to Construction in FY 2006-07.
- Revise the project scope from a four-lane freeway to a six-lane freeway as originally programmed.
- Shift \$9,461,000 programmed in the Interregional Improvement Program (IIP) from Construction to Environmental (PA&ED) and Design (PS&E).
- Shift \$6,355,000 programmed in the IIP from Construction to Construction Support.
- Shift \$1,209,000 programmed in the Regional Improvement Program (RIP) from Construction to Construction Support.

BACKGROUND:

The Federal Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU), enacted in August 2005, authorizes funding through the Border Infrastructure Program (BIP) to improve transportation at international borders, ports of entry, and in trade corridors. This program replaced the TEA-21 Coordinated Border Infrastructure discretionary program which ended after 2005. The new BIP provides California a total apportionment of \$105,818,000, with an Obligation limitation of approximately \$91,289,000.

Pursuant to Section 164.1 of the California Streets and Highways Code, the BIP funds are to be programmed in the STIP in the same manner as other federal funds made available for capital improvement projects.

Reference No.: 2.1b. November 8-9, 2006 Page 2 of 4

These BIP funds are eligible in a border region, defined as any portion of a border State within 100 miles of an international land border with Canada or Mexico, for the following types of improvements to facilitate/expedite cross border motor vehicle and cargo movements:

- improvements to existing transportation and supporting infrastructure
- construction of highways and related safety and safety enforcement facilities related to international trade
- operational improvements, including those related to electronic data interchange and use of telecommunications
- modifications to regulatory procedures
- international coordination of transportation planning, programming, and border operation with Canada and Mexico.

The Route 905 freeway project will improve the safe movement of motor vehicles at and across the border between California and Mexico, which is consistent with the eligibility requirements of the Border Infrastructure Program. The Otay Mesa Port of Entry (POE) is the largest commercial crossing on the California/Mexico border and handles the third highest volume of trucks and dollar value of trade among all United States/Mexico land border crossings. Currently, the POE remains connected to California's highway system by a six-lane city street with a demand three times greater than capacity.

This project was originally programmed to provide six travel lanes connecting Route 805 to the Otay Mesa Border POE. The overall project is to be constructed in four phases. Due to escalating construction costs that caused a substantial funding shortfall to the project and to stay within STIP Programming Guidelines, SANDAG and the Department down-scoped Phase 1 of the project to a four-lane freeway from Siempre Viva to Britannia Boulevard in May 2005.

In June 2006, a 12-month time extension for the period of project allocation was approved for Construction programmed in FY 2005-06. This allowed time for legislation to establish procedures for programming and accessing SAFETEA-LU BIP funding to fully fund the original six-lane freeway project.

The Route 905 project is currently ready for construction, but has an unfunded need of \$93,289,000. The proposed programming of \$81,289,000 in SAFETEA-LU BIP funds and the availability of \$12,000,000 in SAFETEA-LU Earmarks, would fully fund Phase 1 of the original six-lane freeway project. Phase 1 also includes interchanges at Caliente Avenue, Britannia Boulevard, and La Media Road.

The Department and SANDAG are also proposing the following shifts between components: 1) shift \$9,461,000 of IIP Construction in FY 2005-06 to PA&ED (\$4,207,000) and PS&E (\$5,254,000) to cover cost increases in these phases; and 2) shift \$6,355,000 IIP Construction in FY 2005-06 to IIP Construction Support and \$1,209,000 RIP Construction in FY 2005-06 to RIP Construction Support in order to fully fund Construction Support for this project.

Reference No.: 2.1b. November 8-9, 2006 Page 3 of 4

The remaining unfunded phases of the Route 905 corridor consist of the landscape portion of Phase 1 (\$16 million); Phase 2, the Route 805/905 interchange improvements (\$13-\$16 million); Phase 3, the Route 125/905 interchange (\$64-\$85 million); and Phase 4, the Heritage Road interchange (\$27-\$35 million) (to be constructed by others). The total unfunded need for this work is approximately \$93-\$117 million.

RESOLUTION:

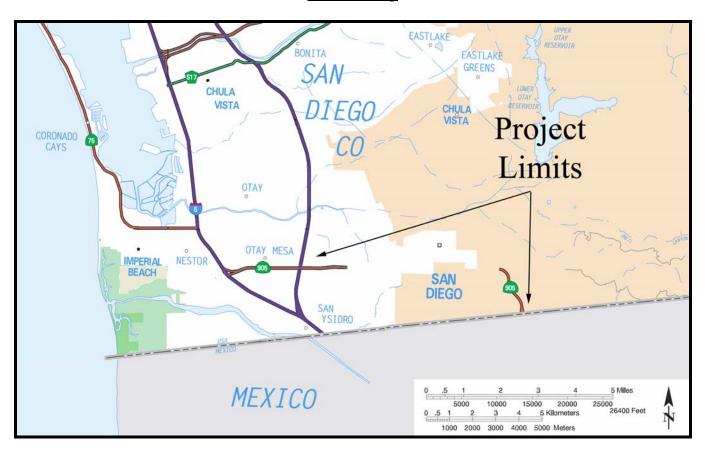

Resolved, that the California Transportation Commission revise the 2006 State Transportation Improvement Program at the end of the 30-day notice period in accordance with the attached spreadsheet that illustrates the proposed programming changes for the project.
